

SOLAR BONDING LUG

New Product

SPEC2.5-10 solar bonding lugs are designed to bond the frames and mounting structures of solar photovoltaic systems in accordance with NEC® requirements. These lugs are corrosion-resistant and galvanic ally compatible with copper grounding conductors and aluminum photovoltaic module frames.

The solar bonding lugs are supplied with the required mounting hardware and are easy to install. The stamped lug has a lay-in feature that allows the positioning of the grounding conductor along multiple frames prior to securing the wire. In addition, the same hex head power driver can be used to install the lug to the frame and secure the wire into the lug.

Other versions are available on request

FEATURES

- * Common hardware used for attaching the lug and securing the conductor to simplify installation
- * Provided with all hardware shown
- * Stainless steel hardware includes serrated washers for superior bond to anodized aluminum
- * Lay-in feature is ideal for installation underneath module frames
- * Accommodates 2.5 to 10mm² Copper cable
- * UL® 467 Listed

Part Number	Conductor Range	Material
SPEC2.5-10	2.5 - 10mm ²	Copper Alloy
